

MAKING CONNECTIONS

PUBLIC REALM INTERVENTIONS

The Framework provides an opportunity to create new routes for walking and cycling. It also provides an opportunity to create spaces and buildings that open up views to the River Rea. Some of the potential public realm improvements are explored on this board.

- 01 Define two active streets through heart of Digbeth
- 02 Activate arches under the Bordesley Viaduct
- 03 Enhance and celebrate the River Rea & the canal
- 04 Pedestrian courtyards specific to context
- 05 Transform Duddeston Viaduct into elevated park

Creating a characterful industrial landscape

A programmed Digbeth that supports its community and cultural momentum

Strategic use of planting focused around past and present waterways

A view along the river Rea

A view of new public space to rear of East Side
